

AIM:

To setup an azure devops project for efficient collaboration and agile work management.

STEPS:

1.

2.

3.

The screenshot shows the 'Music Playlist Batch' project summary in Azure DevOps. The left sidebar contains navigation links: Overview, Summary (selected), Dashboards, Wiki, Boards, Repos, Pipelines, Test Plans, and Artifacts. The main content area has a header with the project name and a search bar. Below the header, there's a section titled 'About this project' with a description of the Music Playlist Batch Creator system. To the right, there's a 'Project stats' section showing '7 Work items' and '0 Work items' for the 'Last 7 days' period. Below that, a 'Members' section shows one member, 'NS'.

About this project

The Music Playlist Batch Creator is a system designed to simplify the creation and management of music playlists. It allows users to generate playlists based on categories such as mood, genre, and artist, making music organization more efficient. The system includes features like user authentication, playlist creation, editing, and filtering, enabling users to manage playlists easily. It follows a structured architecture with a user interface, backend processing, and database management, where data related to users, songs, and playlists is stored. The project also applies Agile practices such as sprint planning and task management using Azure DevOps, along with test cases to ensure proper functionality. Overall, it provides a user-friendly platform for managing music playlists efficiently.

The screenshot shows the 'Work items' board for the 'Music Playlist Batch Creator' project in Azure DevOps. The left sidebar contains navigation links: Overview, Boards (selected), Work items, Backlogs, Sprints, Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Artifacts. The main content area has a header with the project name and a search bar. Below the header, there's a section titled 'Work items' with a 'Recently updated' filter and a '+ New Work Item' button. Below that, there's a table of work items with columns: ID, Title, Assigned To, State, Area Path, and Tags. The table lists 13 work items, all assigned to 'Unassigned' and in the 'To Do' state, with the area path 'Music Playlist Batch Creator'.

Work items

Recently updated + New Work Item Open in Queries Column Options Import Work Items Recycle Bin

Filter by keyword

ID	Title	Assigned To	State	Area Path	Tags
6	User login system	Unassigned	To Do	Music Playlist Batch Creator	
5	Add songs to playlist	Unassigned	To Do	Music Playlist Batch Creator	
8	Design UI	Unassigned	To Do	Music Playlist Batch Creator	
7	Delete playlist	Unassigned	To Do	Music Playlist Batch Creator	
4	Create playlist feature	Unassigned	To Do	Music Playlist Batch Creator	
13	Testing	Unassigned	To Do	Music Playlist Batch Creator	
12	Backend logic	Unassigned	To Do	Music Playlist Batch Creator	
11	Design UI	Unassigned	To Do	Music Playlist Batch Creator	
10	User Account Management	Unassigned	To Do	Music Playlist Batch Creator	
9	Music Playlist Management System	Unassigned	To Do	Music Playlist Batch Creator	

RESULT:

Successfully created an Azure DevOps project with user story management and agile workflow setup.
