

Aim:

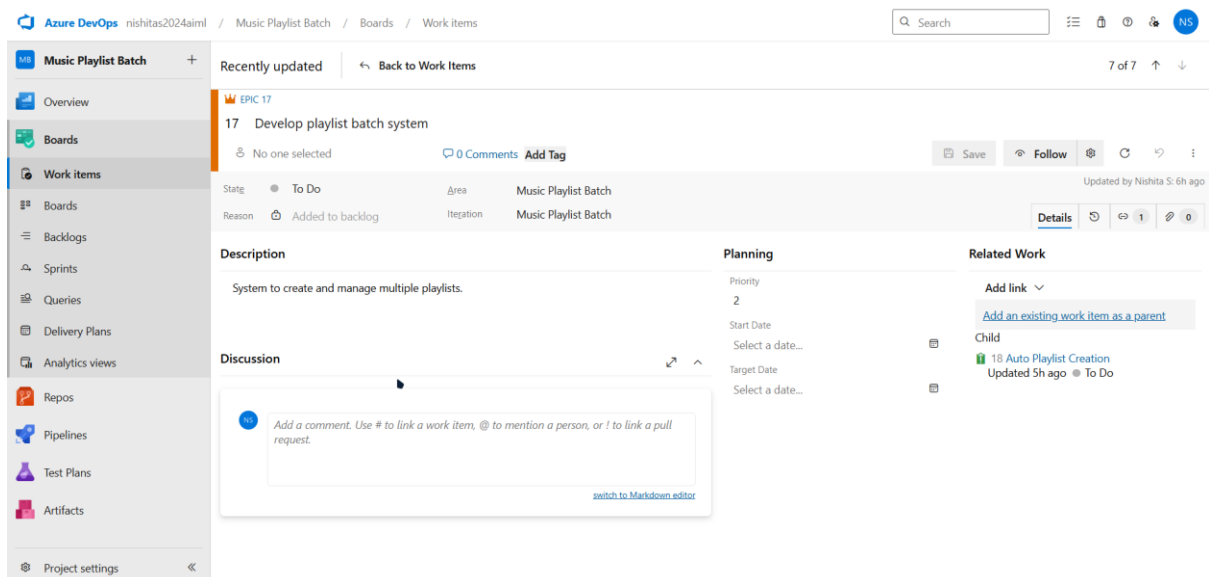

To learn about how to create epics, user story, features, backlogs for your assigned project.

Steps:

1.

2.

3.

The screenshot shows the Azure DevOps interface for a project named 'Music Playlist Batch'. The left sidebar contains a navigation menu with options: Overview, Boards, Work items, Backlogs, Sprints, Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Artifacts. The 'Work items' section is active, showing a list of items. The selected item is a Task (ID 20) titled 'Design user interface for playlist creation'. The task is in the 'To Do' state, assigned to 'No one selected', and has 0 comments. The task details panel on the right shows the 'Description' field with a placeholder 'Click to add Description.', the 'Planning' section with 'Priority 2' and 'Remaining Work', and the 'Deployment' section with instructions on how to track releases. The 'Discussion' section at the bottom has a comment box with a placeholder 'Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request.'

4.

The screenshot shows the Azure DevOps interface for the same project. The 'Work items' section is active, showing a list of items. The selected item is an Issue (ID 19) titled 'As a user, I want to create playlists based on categories so that I can listen easily.'. The issue is in the 'To Do' state, assigned to 'No one selected', and has 0 comments. The issue details panel on the right shows the 'Description' field with the text 'User selects mood, genre, artist etc.' and a link to 'convert this field.'. The 'Planning' section shows 'Priority 2' and 'Effort 3'. The 'Deployment' section has instructions on how to track releases. The 'Discussion' section at the bottom has a comment box with a placeholder 'Add a comment. Use # to link a work item, @ to mention a person, or ! to link a pull request.'

Result:

Thus, the creation of epics, features, user story and task has been created successfully.
